

SALAMIDE – 500

(Versatile wetting & dispersing agent)

Classification:

Highly hydrophilic New generation Reactive Esters based dispersing and Collagen - Fibre Opening agent

Product specification:

Appearance	: clear viscous liquid.
Active Matter	: 60 % + 2%
Charge	: Nonionic
pH	: 9 to 10.5
Solubility	: Easily soluble in water
Shelf Life	: 12 months from the date of manufacture if stored away from extreme conditions & humidity

Properties :

- SALAMIDE-500 is a strong Chrome Dispersing Agent when applied during chrome tanning and re-chroming stage.
- It helps in rapid and uniform soak back of wet blue.
- By activating the free radicals of chrome tanned hides it allows a complete reaction of the hide with all the retannage products , fat liquoring and dye.
- SALAMIDE-500 speeds up & enhances the bating operation when added with Bate.
- It has collagen fibre opening character, thus helps to solve problem of growth mark, drawn grain, back bone hardening and thus the final look of Hides and Skins appear smooth and flat.
- It is amphoteric and can be used at pH ranging from 2 to 7.5.

Properties :

- The product can be used in post wet blue operations in the drum without dilution, running time 90-120 mins. For best results
- The dosage varies from 1.0% to 4.0% depending upon requirement for any type of article.

Packing Available in : (Liquid) 50 / 100 Kgs. HDPE Drums.
