# SALWET - N

# **Classification:**

Non-ionic detergent, wetting agent and dispersant for leather processing.

## **Application & Dosage:**

- Chrome-tanned leathers stored for a long time in wet condition can be prewashed with 0.2 to 0.4% of SALWET -NE on shaved weight to ensure uniformity
- Use of 0.2 to 0.5% of SALWET NE on wet salted weight of raw stock in soaking gives cleaner and uniformly soaked hides and skins.
- It is suitable for stripping of vegetable tanned and E.I leathers along with mild alkalies to give cleaner stripped leathers free from natural greases, oils etc. The best method is to run the skins with 1.0 to 1.5% of SALWET - NE on dry weight of leathers for one hour and leave overnight in the bath. Next day morning addition of alkalis for stripping can be proceeded with, followed by thorough washing.

### Product specification:

Appearance

Active matter pH (1:10 dilution) Stability

Chemical Composition : Based on Alkyl polyglycol ether Pale yellow to colourless transparent liquid  $40 \pm 2\%$ 6.5 - 8.5 To pH above 3.0 stability is excellent. Whereas to strong acids and alkalis It is fairly stable.
