

# SALNOL- BLS

(Sulphited Vegetable oil based Fat liquor for leather industry)

## Classification :

Sulphited Vegetable oil based fat liquor which helps to impart body, softness and fullness for all types of Leathers.

## Features:

- **SALNOL-BLS** forms stable and very fine emulsion with cold water.
- It is good penetrative type fat liquor which imparts softness and mellow handle and dry feel to leathers.
- It is used for making uppers, lining and other light leathers. It is particularly suitable for nubuck and other articles, to be buffed because it gives short fine nap with sheen.
- It imparts a full round handle with good body to the leathers.
- It also improves tensile strength of the leathers.

## Characteristics :

Chemical Composition	: Sulphited Vegetable Oils Blend
Active Matter	: 60±2%
pH (1:10 Dilution)	: 6.5 - 7.5
Stability to Electrolytes	: Stable to acids, chrome, salts, alkalis & electrolytes.
Light fastness	: Good
Charge	: Anionic
Shelf life	: Twelve months under ideal conditions
Dilution	: Emulsifiable in any ratio with cold or warm water.

## Applications:

- for garment leathers 6-10% on shaved weight can be recommended.
- for buff and cow uppers 3-5% on shave weight can be recommended.
- for buff and cow nubuck leathers 4-6% on shaved weight can be used.
- for suede leathers 4-6% on shaved weight can be used.
- for lining leathers 2-4% on shave weight can be used.

## Packing available in:

50 /120 kgs. HDPE Carbuoy.
