

SALASARTAN-SA-R7

Classification :

SALASARTAN- SA-R7 is a nitrogen containing polymeric resin syntan suitable for processing all types of leathers.

• Properties:

- **SALASARTAN- SA-R7** is useful in filling belly portion of leather while using dyeing retannage.
- In retanning, it is helpful to avoid belly to neck variation thereby improving the cutting value of leather.
- It has selective filling action mainly on loose structured parts of leather. It is very much suitable for good buffing properties on Nubucks/ Suedes.
- It is a “free from free formaldehyde” syntan and can be used with other synthetic or vegetable tannins. It can be used for all types of leather articles.

Characteristics :

Appearance	:	Pale brown coloured powder
Active matter	:	95% \pm 2%
pH of 10% solution	:	95% min.

Indications for application:

- 4.00 % - 6.00 % on shaved weight for full grain or corrected grain leathers.
- 2.00 % - 4.00 % on shaved weight for garment leathers.

Shelf Life / Storage Stability:

One year if stored properly at ambient temperature in supplied packing.

Packing Available in: 25 Kgs LDPE Bag.
