

# SALASARTAN- SA-AN

## Classification :

SALASARTAN- SA-AN is an amphoteric replacement syntan based on aromatic sulphonic acid condensation products.

## Properties:

- Due to its amphoteric pH, it is compatible with chrome, anionic dyes or auxiliaries. It acts as a pre-base filling for loose skins when used in rechroming.
- It imparts good fullness with softness and disperses well along with anionic dyes thereby giving clear and bright shades.
- It can be used in combination with or prior to synthetic, vegetable and chrome tanning agents.

## Characteristics :

Appearance	:	Off White Colour Powder
Active matter	:	95%+/-2%
pH of 10% solution	:	3.0-5.0

## Indications for application:

2.0 % - 3.0 % on shaved weight for garment leathers in rechroming.  
3.0 % - 4.0 % on shaved weight for garment leathers during retanning.  
6.0 % - 8.0 % on shaved weight for upper leathers during retanning.

## Shelf life / storage stability:

One year if stored properly at ambient temperature in supplied packing.

## Packing available in:

25 kgs LDPE bag.
