

SALASARTAN - SA - DS

Classification :

universal dye leveling and dispersing syntan for Leather dyes application.

Properties:

- **SALASARTAN - SA - DS** is an auxiliary syntan. Due to high dispersing power, it promotes uniform distribution and penetration of dye stuffs, syntan and anionic fat-liquors.
- It prevents defects to get accentuated on the grain side of leather. It also improves levelness of shade in lower grade leather. It imparts good level dyeing, specially recommended for nubucks or suedes leather to get even dyeing.
- It improves dispersion of vegetable and resintanning agent in less duration. It also helps for better distribution of Protein filler in low density fibre area when used along with protein filler.

Shelf life / storage stability:

One year if stored properly at ambient temperature in supplied packing.

Packing available in:

25 Kgs. LDPE Bag

Characteristics :

| | | |
|--------------------|---|--------------------------|
| Appearance | : | Light brown free flowing |
| Active Matter | : | 95%+/-2% |
| pH of 10% solution | : | 7.5 – 9.55 |

Indications for application:

- 0.50%-2.00% to be added 10 minutes prior to dye addition as Dye-Leveling agent.
- 1.00%-2.00% to be added with vegetable tannage or during retannage.
- 0.50%-1.00% to be added during the last 10 minutes in fat-liquoring operation before acidification for better exhaustion of fat-liquors.
