

NEUTRISALT

Classification :

NEUTRISALT is a mixture of organic and inorganic complexing agent used for neutralization in leather processing.

Properties:

- It is neutral in action and does not precipitate the chrome.
- It imparts even neutralization without making the grain drawn and harsh.
- It has buffering action on leather surface resulting in uniform and rich dyeing.
- It should not be used as dye dispersing or penetration agent as many of the dyes may show different behavior and change of colour.
- It is a "free from free formaldehyde" auxiliary. It can be used for all types of leather articles.

Characteristics :

Appearance	:	Off white Coloured powder
Concentration	:	95%+/-2%
pH of 10% solution	:	8.0–10.0

Indications for application:

- 1.0 % - 3.0 % recommended dosage on shaved weight, depending upon desired pH of neutralization for drum dyeing.

Shelf life / storage stability:

One year if stored properly at ambient temperature in supplied packing.

Packing available in:

25 Kgs. LDPE Bag
