

# SALASARTAN - ND

(Moderate Dye levelling & Dispersing Agent for Leather Industry)

## Classification :

SALASARTAN - ND is naphthalene based dye levelling cum dispersing Syntan for Chrome tanned Leathers.

## Features:

- Due to its composition it has got good buffering action and it ensures good penetration of dyes and other retanning agents throughout cross section of medium thickness leathers.
- It reduces the cationic charge of chrome tanned Leather & improves dyeing & fat liquoring properties.
- It improves the Penetration of dyestuffs and do not bleach the colour.

## CHARACTERISTICS :

Chemical Composition :	Salt of Napthalene Sulphonic acid Condensate
Physical Appearance :	Light brown powder
% Moisture content :	5.0 max
Active Matter :	95% min
pH (10% Dilution) :	7.0-8.0
Solubility :	Readily soluble in water

## Applications:

- For good dye levelling & penetration in shoe upper Leather with medium thickness recommended dosage is 2-3 % on shaved weight
- It should be used for Good dispersion of Syntans & Vegetable tanning agents upto 2% on shaved weight.

## Packing available in:

(Powder) 25 Kgs. HDPE Bag
