

# SALASARTAN - PCBJ3

(Bleaching Tanning agent for veg. tanned leather)

## Classification :

SALASARTAN – PCBJ3 is naphthalene sulphonic acid condensation based bleaching tanning agent for veg. tanned or retanned leather.

## Properties:

- SALASARTAN -PCBJ3 is bleaching tannin agent and produces neutral pale leather colour from veg tanned or retanned leather.
- It bleaches the colour of the leather very evenly and does not impair resistance to cracking of the grain while applied in proper way.
- It is stable to iron and does not give discolouration. Iron stains formed on veg tanned leather can be removed.

## Characteristics :

Chemical Composition	: Napthalene Sulphonic acid Condensate Product
Physical Appearance	: Light brown powder
% Moisture content	: 5.0 max
Active Matter	: 95% min
pH (10% Dilution)	: 3.0 – 3.5
Solubility	: Readily soluble in water

## Indications for application:

- Light and medium weight leathers are drummed with 3-5% of PCBJ3 to get the desired bleaching effect.

## Packing Available in:

(Powder) 25 Kgs. HDPE Bag
