

SALASARTAN MV - QUB

(Quebracho Extract based Veg. Tanning agent)

Properties:

- SALASARTAN MV - QUB is based on modified Quebracho vegetable tanning agent. It imparts properties to the leather which are similar to Quebracho.
- It is ideally suitable for retannage of Chrome tanned leather for all types of leathers.
- It is suitable for the production of high veg leather with good filling and mellow handle.
- It imparts beige colour to leather hence can be used for all types of coloured leather production. It imparts good buffability to leather

Applications:

- SALASARTAN MV - QUB is used usually after neutralization during retannage in combination with other anionic retanning agent. It gives good results while using alongwith Mimosa powder & Tara powder based veg tanning agents.
- It can be used up to 4 - 6 % in articles like shoe Upper, Leather Goods.
- It can be used up to 2 - 4 % in Shoe Nappa & Lining Leathers.
- It can be used up to 4 - 6% in Natural grain milled articles.

Characteristics :

Chemical Composition	: Based on Quebracho Extract with dispersant
Appearance	: Redish Brown powder
Ionic charge	: Anionic
pH (10% Dilution)	: 3.5 – 5.5
Moisture Content	: 5 - 7%

• Shelf Life / Storage Stability:

One year if stored properly at ambient temperature in supplied packing.

Packing:

25 Kgs HDPE Bag.
