

SALASARVEG - CN8

Properties:

- SALASARVEG – CN8 is based on modified vegetable tanning agent. It imparts properties to the leather which are similar to Chestnut.
- It imparts yellowish cream colour to processed leather. This is not suitable for white and very pastel colour leathers. This does not bleach the leather hence very much suitable for Brown & Black colour leather production.
- It is ideally suitable for retannage of Chrome tanned leather for all types of leathers.
- It has got excellent dispersion and penetration power. It imparts excellent filling effect, mellow handle, good grain tightness with round handle.
- It has good buff-ability properties and thus suitable for Nubuck and suede articles.

Applications:

- SALASARVEG – CN8 is used usually after neutralization during retannage in combination with other anionic retanning agent.
- 4% - 6 % ; Shoe Upper, Leather Goods for dark colour leathers.
- 3% - 6 % ; Shoe Nappa & Lining Leathers for dark colour leathers
- 10 % - 20 % ; for conversion of wet blue to high veg leather along with other retannage in combination
